Work History

Sep. '21 - Principal Engineer

Jan. '25

Fortify, fortifypay.com, Raleigh, NC

- Led the development of Fortify, a fintech platform enabling vendors to offer purchase and financing options, structure payment streams, and manage deal lifecycles.
- Processed over \$300M in equipment financing deals, with the product team directly responsible for over \$2.4M in new volume on the Payments product.
- Built a team, including two junior developers, to drive feature development and maintain the platform's stability.
- Partnered with operations teams to translate business needs into technical solutions, enhancing user experience and operational efficiency.
- Managed support queues and ensured swift resolution of platform issues.

May '19 - Full Stack Engineer

Dec. '21

Malartu, malartu.co, Raleigh, NC

- Developed data visualization and analytics tools to help businesses make data-driven decisions.
- Created integrations with various third-party services to bring critical business data into a unified platform with Elixir.
- Delivered user-friendly dashboard software using Ember JS.

Jan. '15 - Independent Consultant

Dec. '19

Tim And Company, Raleigh, NC

- Ran a boutique consulting firm providing software development and technology strategy services.
- Specialized in small business applications and data integrations.

Projects

Flightlines

flightlines.co

Created a commercial aviation news brand delivering weekly industry insights and analysis. Established as a trusted source with a growing on-line presence, including social media channels, with plans to expand into e-commerce.

Durham Materials Company

Durham, NC

Collaborated on an initiative to develop and market an all-natural waterproof cotton material. This project involved researching sustainable manufacturing methods, coordinating with suppliers, and driving early-stage product testing to refine durability and water resistance properties.

Flight Simulation

Raleigh, NC

Dedicated significant hours and study to various airframes and avionics packages to stay current with technology and modern air traffic control practices, in Microsoft Flight Simulator with Navigraph charts over the VATSim network.

Aug. '15 -
Apr. '19

Software Developer

Vaporware, vaporware.net, Raleigh, NC

- Built and maintained custom software solutions for start-ups, with a focus on MVP development and scaling.
- Guided clients through Agile development processes, prioritizing efficient delivery of high-value features.
- Acted as a technical advisor for clients, bridging gaps between business needs and technical implementation

Education

Jan. '07 -
Jan. '09

NC State University, BA - Arts Applications

College of Humanities, Arts, and Social Sciences, Raleigh, NC

- Focused on the intersection of film theory, production, and multimedia.
- Relevant coursework: Digital Video Production, Advanced Multimedia, Documentary Film, and Screenwriting.
- Honors: Full Frame Documentary Festival Fellow (2009).

Jan. '11 -
Dec. '12

NC State University, Art & Design, Master's Program

College of Design, Raleigh, NC

- Engaged in advanced studies exploring the integration of technology and art.

May '08 -
July '08
